SKILLS

- Software Development: Javascript, Node JS, ReactJS, React Native, SQL- Snowflake, SQL Server, DynamoDB, C#, CI/CD, AWS : EC2, SAM, IAM, SES, Route53, VPC, WAF etc., DSA, LLD, HLD
- Other Tools: PowerB, Github

EDUCATION

- 2024-26 Georgia Institute of Technology – MS in Computer Science (Online) : Present
- 2015-19 BVCOE, GGSIPU - B.Tech(IT) : 82%
- 2015 CBSE 12th : 86%
- 2013 CBSE 10th : 95%

ACHIEVEMENTS AND CERTIFICATIONS

- Awarded “Star Performer” (April–September 2023) at Glida
- Received “Upcoming Shining Star” award in 2020 at Indus Valley Partners

PROFESSIONAL EXPERIENCE

JUL'25- PRESENT

Vichara Technologies - Technical Lead

- Developing financial data management applications for hedge fund operations using TypeScript, SQL, Microsoft Azure, and Zoho APIs.

JANUARY'25- JUL'25

Q3 Technologies - Senior Software Engineer

- Worked on database optimization and feature development for a major application serving millions of users.
- Developed processes in C# and SQL to migrate and sync data between multiple applications via scheduled batches and callbacks.

NOVEMBER'21-NOVEMBER'24

Glida - Tech Lead

- Led the product team and designed architectures, conducted code reviews and enabled SDLC practices.
- Developed and managed Glida's software infrastructure, including the B2C IOS and Android mobile app, Websocket based EV charger backend and customer backend dashboards, Data Adaptation and Analytics for Power BI
- Technologies: React Native, AWS, React JS, NodeJS, Lambda, SQL(Snowflake) and NoSQL, Java and Security, CI/CD, Jira
- Independently built scalable applications: Bulk emailing system using NodeJS and Queues (1 million emails within 4 hours), Web based secure charging, OCPI hub, Data adapter from DynamoDB to snowflake and many small utilities.

JULY'19 - NOVEMBER'21

Indus Valley Partners - Associate Engineer

- Skills: C#, JavaScript, and SQL to architect and develop applications for data utilization and storage.
- Developed user-friendly interfaces, enabling seamless data uploading and analysis through grid structures w
- Created highly optimized SQL jobs to execute daily data loads with 5 lakh+ rows within 2 seconds.
- Independently built: WSO Data Adapter, TWRR Returns Calculation and Dashboards, IR Dashboards and other utilities.

JUNE'18- JUNE'19

Arbunize Digital Media - Intern

- Led the end to end development of a native Android resume-building app using Android, Node JS, Feathers JS, Social login, Google Location APIs, Firebase Notifications, Webview with Cookies, Volley, Adapters.etc

JAN'18 - FEB'18

Edumax - Intern

- Built a complete web interface using C#, MVC, and JavaScript/AJAX.

JUN'17 - NOV'17

The Brainhub Technologies - Intern

- Designed and developed a social networking app with SOAP API integration.
